BX Daily Activities
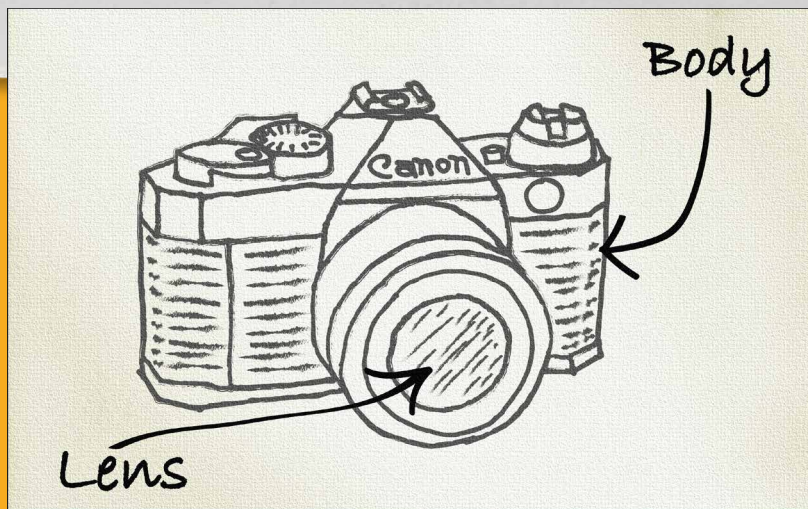

Draw a Camera and Photography Task

Draw A Camera (Ages 5-11)

Draw the best camera you can. Bonus points if you can name the parts! (List all the relevant parts like lens, body, etc.)
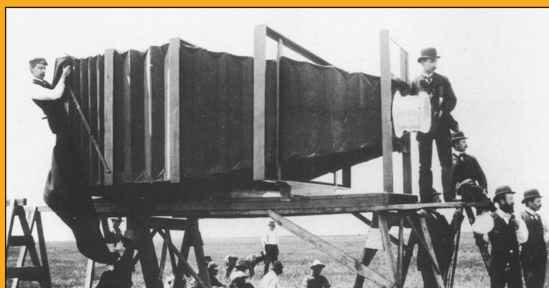

**Photography Task:
Shadows and Reflections**

(Ages 12-17)

Photography is all about light, so with this activity we want you to look for shadows and reflections.

A shadow is a dark shape that is formed when an object blocks a source of light. On a sunny day, practically everything casts a shadow, including you.

A reflection happens when light bounces off an object. If the surface is smooth and shiny, like glass, water or polished metal, it will reflect like a mirror.

Fun fact: Johann Zahn designed the first camera in 1685.

Please share all the results from your activities with us.

We'd love to see them!
