A Closer Look & Fun Colours

A Closer Look (12-17yrs)

Close-ups or 'macro' photographs reveal a world that we would ordinarily ignore.

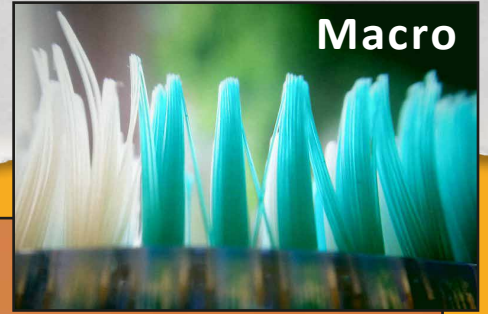

Search around your home for interesting objects that you can photograph up close and reveal hidden details, interesting textures and unusual perspectives.

Can you guess the object in the macro image shown here?

Close-up

Macro

Fun Colours (5-11yrs)

Pick a colour, then take a trip around your house and photograph as many different objects as you can that are the same colour.

Put all the objects you find together in a group and take a photograph.

The photo here is by an artist called Lori Dorn who arranges objects of the same colour together.

Please share all the results from your activities with us.
We'd love to see them!
